## ZADOK Foundation

**PRESS STATEMENT BY ZADOK FOUNDATION ON THE OCCASION OF THE WORLD EARTH DAY,  
22ND APRIL 2023 WITH THE THEME INVEST IN THE PLANET.**

The Zadok Foundation joins thousands of environmentalists, keepers of nature and earth conservationists all over the world to observe the World Earth Day 2023. The theme for this year's Earth Day is Invest in the Planet! The aim of the Earth Day celebration is to raise awareness about environmental issues and promote conservation efforts to protect the planet.

The Earth Day is an annual event on April 22 to demonstrate support for environmental protection.

It was first held on April 22, 1970. This year marks 53 years of Earth Day celebration.

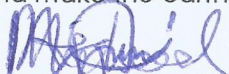

Protecting the environment matters to everyone in the home, workplace and the community.

On this unique day, Zadok Foundation calls on men, women and youths to do the following:

- Reduce, Reuse and Recycle waste in your home.
- Conserve energy at home and workplace. Turn off lights and electronics when not in use.
- Reduce paper waste. Avoid paper bills. Print only important articles and materials.
- Reduce pollution by recycling old computers, phones etc
- Give your car a break: some days leave your car at home and walk or take public transportation. You are reducing greenhouse gas emission and you are saving the planet.
- Support local businesses and communities by buying local produce. This will reduce shipping food sourced from overseas.
- Get involved in environmental work in your local community. Make your communities greener! Clean parks. Engage in sanitation exercise.
- Clean Up Plastic in Your Neighborhood or community!
- Use Wildflowers and Native Plants.
- Stop Pesticides and Chemicals in your farms.
- Conserve Water!
- PLANT TREES! PLANT TREES! PLANT TREES!

Zadok Foundation is a faith based organization with a mission to provide relief and assistance to the under-privileged and vulnerable populations through education, health care, value orientation and entrepreneurship skills.

Zadok calls on Government, Corporations and individuals to invest positively in the planet and make the earth a healthy, safe, and sustainable place!
